Review of SystemsGeneral/Constitutional:

Headache denies. Sleep disturbance admits, wakes up frequently at night.

Cardiovascular:

Chest pain denies.

Palpitations denies.

Respiratory:

Cough denies. Shortness of

Reason for Appointment

1. I phone [REDACTED]

History of Present IllnessConstitutional:

Waylon has a telehealth visit today d/t concerns with anxiety, irritability, poor sleep, and feeling tearful and depressed for 1 week. He was arrested 1 week ago d/t a social media post that had gone viral. Since then he has felt disconnected and isolated. He is waking often despite the trazadone. He is fearful of the unknown because he will now have to proceed with court hearings and so on. He denies suicidal or homicidal ideations.

He is also complaining of shoulder pain and numbness and tingling going down his left arm after being handcuffed for approximately 4 hours.

Unable to obtain vital signs d/t not having BP cuff at home.

ExaminationGeneral Examination:

GENERAL APPEARANCE: alert, well hydrated, in no distress , cooperative.

HEAD: normocephalic, atraumatic.

EYES: BOTH EYES, normal, conjunctiva clear.

NOSE: nares patent.

PSYCH: alert, cooperative with exam, good eye contact, anxious appearing.

Assessments

1. Situational mixed anxiety and depressive disorder - F43.23
2. Pinched nerve in shoulder - G56.80 (Primary)

Treatment**1. Pinched nerve in shoulder**

Start Gabapentin Capsule, 100 MG, 1 capsule, Orally, Once a day, 30 day(s), 30

2. Situational mixed anxiety and depressive disorder

Start Venlafaxine HCl Tablet, 37.5 MG, 1 tablet with food, Orally, Once a day, 30 day(s), 30

Referral To: Kim Rivers

Reason:

3. Others

Clinical Notes: I have read and agree with documentation by Kayla Dunn, FNP.

BAILEY, Waylon A DOB: [REDACTED]

Reason for Appointment

1. I phone [REDACTED]

History of Present Illness

Constitutional:

Waylon has a telehealth visit today d/t concerns with anxiety, irritability, poor sleep, and feeling tearful and depressed for 1 week. He was arrested 1 week ago d/t a social media post that had gone viral. Since then he has felt disconnected and isolated. He is waking often despite the trazadone. He is fearful of the unknown because he will now have to proceed with court hearings and so on. He denies suicidal or homicidal ideations.

He is also complaining of shoulder pain and numbness and tingling going down his left arm after being handcuffed for approximately 4 hours.

Unable to obtain vital signs d/t not having BP cuff at home.

Examination

General Examination:

GENERAL APPEARANCE: alert, well hydrated, in no distress , cooperative.

HEAD: normocephalic, atraumatic.

EYES: BOTH EYES, normal, conjunctiva clear.

NOSE: nares patent.

PSYCH: alert, cooperative with exam, good eye contact, anxious appearing.

Assessments

1. Situational mixed anxiety and depressive disorder - F43.23
2. Pinched nerve in shoulder - G56.80 (Primary)

Treatment

1. Pinched nerve in shoulder

Start Gabapentin Capsule, 100 MG, 1 capsule, Orally, Once a day, 30 day(s), 30

2. Situational mixed anxiety and depressive disorder

Start Venlafaxine HCl Tablet, 37.5 MG, 1 tablet with food, Orally, Once a day, 30 day(s), 30

Reason for Appointment

1. Follow up superficial thrombu to right sapenous vein
2. Pinched nerve

History of Present Illness

HPI:

New/Follow-up Patient Consult:

Have you had any falls in the last year? No.

Waylon is here for follow-up. Last fall he developed superficial thrombophlebitis in the right lower extremity. There is a lot of swelling. Because of the severity of the swelling and acute nature of the thrombus he was started on Eliquis twice daily. He took this for 3 months and has been off of it since. He has been compliant with wearing compression to his bilateral lower extremities. He states the swelling is much improved.

He is complaining today of some left posterior shoulder or back pain. He states it is painful when he is at rest, better with movement. Does have some muscle tightness in his area. No weakness, no tingling.

Attention deficit disorder is fairly well controlled with Adderall 30 mg twice daily. He states he is able to focus, able to function at work. No side effects.

c/o : back pain

denies : weakness.

Depression Screening:

PHQ-2 (2015 Edition)

Examination**General Examination:**

GENERAL APPEARANCE: pleasant, in no acute distress, comfortable.

HEAD: normocephalic, atraumatic.

EYES: BOTH EYES, normal, conjunctiva clear.

Patient: Bailey, Waylon A DOB: [REDACTED] Progress Note: BLAINE M. BROUSSARD,
MD 09/20/2019

Note generated by eClinicalWorks EMR/PM Software (www.eClinicalWorks.com)

NOSE: nares patent.
NECK/THYROID: no adenopathy or masses, no thyromegaly.
SKIN: normal, no rashes.
HEART: regular rate and rhythm, no murmurs, no clicks, no rubs.
LUNGS: clear to auscultation bilaterally, no respiratory distress.
ABDOMEN: no masses palpable, no hepatosplenomegaly, bowel sounds present, soft, nontender.
EXTREMITIES: no clubbing, cyanosis, or edema, intact and symmetrical.
PERIPHERAL PULSES: normal in all 4 extremities.
NEUROLOGIC: nonfocal, cooperative with exam, gait normal.
PSYCH: alert, oriented, anxious.

Assessments

1. Elevated blood pressure reading in office without diagnosis of hypertension - R03.0 (Primary)
2. Long-term current use of testosterone cypionate - Z79.890
3. Edema of right lower extremity - R60.0
4. Current nicotine use - Z72.0

Treatment**1. Elevated blood pressure reading in office without diagnosis of hypertension**

Stop Adderall Tablet, 30 MG, 1, Orally, Twice a day

Notes: Sent home with a BP log. Instructed to avoid testosterone use. Encourage to quit smoking. Instructed to stop Adderall.

2. Edema of right lower extremity

Notes: Compression stocking use encouraged.

3. Current nicotine use

Notes: Smoking cessation education.

4. Others

Notes: 09/20/2019 02:04:21 PM >> Patient education was published to portal (1) Stopping Smoking: Care Instructions. (2) Learning About Benefits From Quitting Smoking.

Clinical Notes: I have read and agree with documentation by Kayla Dunn, FNP.

Follow Up

4 Weeks (Reason: lower extremity swelling, hypertension)

Current Medications**Taking**

- Adderall 30 MG Tablet 1 Orally Twice a day
- Medication List reviewed and reconciled with the patient

Past Medical History

Attention deficit disorder.
Depression.

Surgical History

hand surgery

Family History

none.

Social History**Tobacco Use:**

Tobacco Use/Smoking

Are you a *nonsmoker***Drugs/Alcohol:**

Do you drink alcohol?: Very little 2 times per month maximum.

Miscellaneous:

Exercise: Weight training ed cardio 3-4 times per week.

Allergies

N.K.D.A.

Hospitalization/Major**Diagnostic Procedure**

No Hospitalization History.

Review of Systems**General/Constitutional:**

Change in appetite No.

Fatigue No. Fever No. Headache No.

Lightheadedness No. Sleep disturbance Yes. Weight gain No.

Weight loss No.

Ophthalmologic:

Vision Loss No. Blurred vision No.

Eye Pain No.

ENT:

Ear drainage No. Ear pain No.

Reason for Appointment

1. ADD follow up, wants to discuss getting Prescription for Trazadone, not getting enough sleep

History of Present Illness**HPI:****Depression Screening:**

PHQ-2 (2015 Edition)

Little interest or pleasure in doing things? *Several days***New/Follow-up Patient Consult:**

c/o Insomnia

The symptoms have been occurring *for months*Severity of the symptoms *is moderate*Associated symptoms include *awakening often during the night*Overall condition *is variable*

Have you had any falls in the last year? No.

Do you have any trouble with any of your medications? No.

Pediatric Developmental Evaluation:**ADD Click Thru:****ADD/ADHD/Behavior problems:**

c/o Last complete physical: 1 year ago.

c/o Last labs: 1 year ago.

c/o Current medication: Adderall bid.

c/o Recheck in office: no side effects noted, doing fine on medication.

Vital Signs

Ht 6 ft 2 in, Wt 245 lbs, BP 148/100 mm Hg, HR 98 /min, BMI 31.45 Index, Oxygen sat % 99, Ht-cm 187.96 cm, Wt-kg 111.23 kg.

Examination**General Examination:**

Reason for Appointment

1. Follow-up

History of Present Illness

New/Follow-up Patient Consult:

Pt presents to clinic today requesting to restart ADHD medication, was previously taking Adderall 30 mg BID. States stopped taking medication in February 2018 in attempt to go without medication and see if tolerable. Reports decreased focus/concentration over the past 2-3 months. Pt's job is in the agriculture/nursery field, partakes in manual physical labor outdoors daily, which he states requires a high level of focus. Further reports hx of hyperactivity, with a recent increase in inability to remain on topic with social interaction/conversation.

25 year old male presents with c/o Joint pain

The joint pain *began weeks ago*

The joint pain is located *in both elbows*

The severity of the joint pain *is moderate*

The character of the pain is *achy, sharp, and is intermittent, with mild decrease in activities of daily living Sharp, shooting pain*

Aggravating factors include *exercise, overuse*

Associated factors include *joint pain, joint stiffness To both elbows*

Medication(s) for joint pain include *nonsteroidal anti-inflammatory drugs Minimal to no benefit*

Overall condition *is worsening*

Anxiety

The anxiety has been present for *months*

The anxiety started *gradually and has gotten worse*

The severity of the anxiety *is moderate*

The nature of the anxiety *is a fear of losing control, is a feeling of panic, is a feeling of worry*

Aggravating factors include *being in a crowded space*

Occasional

Alleviating factors include *use of prescription medications*

Associated symptoms include *depression, headache*

Medication(s) include *Zoloft 50 mg daily*

Prior testing include *thyroid function tests*

Overall condition *is improving*

Depression

The depression has been present for *months Onset with death of grandfather in October 2017. Hx of depression at 17 y/o, reports*

took Paxil in the past with minimal effectiveness.

The depression started in young adulthood

The severity of the symptoms is moderate

The nature of the depression is described as depressed mood, irritable mood, lack of energy, no interest in usual activities

Aggravating factors include family stressors, recent losses
 Gradual worsening since death of grandfather in October 17 and recent increased life stressors, disruption in family dynamics

Alleviating factors include antidepressant medications, physical activity

Associated symptoms include early morning awakening, insomnia

Medication(s) include zoloft

Prior testing include a CBC (complete blood count), a chemistry profile, thyroid function tests

Overall condition is improving

ADD/ADHD/Behavior problems:

Vital Signs

Ht 6 ft 2 in, Wt 254 lbs, BP sitting :164/98, HR 101 /min, BMI 32.61
 Index, Ht-cm 187.96 cm, Wt-kg 115.21 kg.

Examination

General Examination:

GENERAL APPEARANCE: pleasant, in no acute distress, comfortable.

HEAD: normocephalic, atraumatic.

EYES: BOTH EYES, normal, conjunctiva clear.

NOSE: nares patent.

NECK/THYROID: neck supple, full range of motion, no adenopathy or masses, no thyromegaly, thyroid nontender.

SKIN: warm and dry, good turgor, no rashes, no suspicious lesions.

HEART: regular rate and rhythm, no murmurs, no clicks, no rubs.

LUNGS: clear to auscultation bilaterally, no respiratory distress.

ABDOMEN: no masses palpable, no hepatosplenomegaly, bowel sounds present, soft, nontender.

EXTREMITIES: no clubbing, cyanosis, or edema, intact and symmetrical.

PERIPHERAL PULSES: normal in all 4 extremities.

NEUROLOGIC: nonfocal, cooperative with exam, gait normal.

PSYCH: alert, oriented, appropriate mood and affect.

Assessments

1. Lateral epicondylitis of both elbows - M77.11 (Primary)
2. Depression - F32.9
3. Physiological insomnia - G47.00
4. Transaminitis - R74.0
5. Attention deficit hyperactivity disorder (ADHD), combined type - F90.2
6. Anxiety - F41.9
7. Elevated blood pressure reading in office without diagnosis of hypertension - R03.0, EKG performed in office - reveals no acute findings, WNL.

Treatment

Patient: Bailey, Waylon A DOB: [REDACTED] Progress Note: BLAINE M. BROUSSARD,
 MD 07/19/2018

Note generated by eClinicalWorks EMR/PM Software (www.eClinicalWorks.com)

1. Lateral epicondylitis of both elbows

Start Mobic Tablet, 15 MG, 1 tablet, Orally, Once a day, 14 day(s), 14 Tablet, Refills 0

Start Voltaren Gel, 1 %, Apply 2 grams to affected area as directed, Transdermal, up to four times a day as needed, 30 day(s), 400 Gram, Refills 3

Notes: Instructed pt to wear compression brace as directed. Adjunct tx discussed includes implementation of RICE. Pt verbalizes understanding of devised POC.

2. Depression

Continue Zoloft Tablet, 50 MG, 1 tablet, Orally, Once a day, 30 day (s), 30 Tablet, Refills 3

3. Transaminitis

LAB: CMP* (Ordered for 07/19/2018) Abnormal
